PROFILE

I am a final-year Software Engineering undergraduate with hands-on experience in JavaScript full-stack development using React.js, Next.js, Node.js, Express.js, and TypeScript. I am passionate about building scalable applications and delivering clean, high-quality software.

EXPERIENCE

Space IT Labs - Seamless Source SAAS Product	Intern Full Stack Engineer	Aug 2025 present
• Worked on full-stack web development using modern JavaScript technologies including Next.js, React.js, Node.js, Express.js, TypeScript, and Tailwind CSS to build and maintain scalable web applications. • Developed and maintained RESTful APIs, reusable frontend components, and optimized backend services while contributing to database design and schema migrations. • Utilized Git-based version control workflows, participated in code reviews, and followed industry best practices to improve code quality and maintainability. • Performed API testing, debugging, and integration validation using Postman to ensure reliable communication between frontend and backend services. • Collaborated in Agile/Scrum development environments by participating in sprint planning, daily stand-ups, backlog refinement, and cross-functional teamwork with developers, QA engineers, and designers.		

Amana Bank PLC	Trainee Banking Assistant	Jan 2022 - Aug 2023
-----------------------	---------------------------	----------------------------

EDUCATION

BSc(Hons) in Information Technology,Software Engineering	
SLIIT	2023 Present
Current GPA: 3.2	
GCE A/L Physical Science Stream(Mathematics Stream)	
Sripalee National College	2018-2021
2C's, 2S's	

SKILLS

- **Programming Languages:** JavaScript, TypeScript, Java, C#, SQL, PHP
- **Frontend Development:** React.js, Next.js, HTML5, CSS3, Responsive Web Design
- **Backend Development:** Node.js, Express.js, RESTful APIs, API Integration, .NET
- **Databases:** MySQL, PostgreSQL, MongoDB, Microsoft SQL Server
- **Version Control & Development Tools:** Git, Postman, Swagger, Docker
- **Software Engineering:** Object-Oriented Programming (OOP), Software Development Life Cycle (SDLC), Agile/Scrum, Unit Testing, CI/CD
- **Cloud & Platforms:** AWS, Supabase
- **Soft Skills:** Team Collaboration, Communication, Technical Documentation, Problem Solving, Fast Learner, Adaptability, Continuous Learning

PROJECTS

Tourism Web Application <https://go-ceylon-frontend.vercel.app/>

This web application helps users easily explore travel destinations, get attraction-based tour guides, interact with an AI-powered chatbot for assistance, and track tours using RFID technology. Administrators can manage tour packages and bookings seamlessly.

- Technologies Used: React.js, Node.js, Express.js, MongoDB, RFID Technology, AI (Chatbot Integration)
- Software Design Pattern Used: MERN Stack Architecture (MVC principles)

AI-Enabled Smart Healthcare Appointment & Telemedicine Platform

Developed a cloud-native full-stack healthcare platform enabling patients to book doctor appointments, attend video consultations, and manage medical records. Implemented using a microservices architecture to ensure scalability, security, and efficient service communication.

- Technologies Used: React, Spring Boot, MySQL, Docker , REST APIs
- Architectural Style Used: Micro services architecture
- Integrated real-time features such as appointment status tracking and notifications
- Designed scalable backend services using Spring Boot and microservices principles

Ceylon House – Disaster-Resilient Housing Management System: [CeylonHouse](#)

Developed a full-stack housing management platform for safer housing decisions through hazard reporting, AI-generated house planning, disaster resilience evaluation, and verified service provider support.

- Technologies Used: React.js, Node.js, Express.js, MongoDB, Tailwind CSS, Leaflet, Google Gemini AI, JWT Authentication
- Architectural Style Used: MVC Architecture

Payroll Management System [Payroll Management System](#)

Developed a full-stack payroll management system for automating salary calculation, attendance tracking, employee management, and HR operations with AI-powered anomaly detection and reporting.

- Technologies Used: C#, .NET 8, ASP.NET Core Web API, React, TypeScript, SQL Server, JWT Authentication, Tailwind CSS

CERTIFICATES

Java (Basic)-Hacker Rank
SQL (Intermediate)-Hacker Rank
Front End Web Development-UOM
Certificate of English-British Council

PROFESSIONAL MEMBERSHIPS

IEEE Student Member
