PROFILE

I am a Software Engineering undergraduate seeking a Software Developer internship. I have a strong foundation in Java, SQL, and web technologies such as HTML, CSS, and JavaScript. I am eager to gain hands-on experience in developing high-quality applications and working collaboratively in a team environment.

EXPERIENCE

Space IT Labs - Seamless Source SAAS Product

Intern Full Stack Engineer

Aug 2025 - Feb 2026

- Worked on full-stack web development using PHP Laravel and Vue.js to build and maintain application features
- Developed and maintained REST APIs, frontend UI components, and performed database design and migrations
- Used Git workflows and joined code reviews to improve code quality.
- Conducted API testing, debugging, and issue resolution using Postman to ensure reliable integrations.
- Actively participated in Agile/Scrum practices, including sprint planning, daily stand-ups, and cross-team collaboration with developers and QA.

Amana Bank PLC

Trainee Banking Assistant

Jan 2022 - Aug 2023

EDUCATION

BSc(Hons) in Information Technology,Software Engineering

SLIIT

2023 Present

Current GPA: 3.2

GCE A/L Physical Science Stream(Mathematics Stream)

Sripalee National College

2018-2021

2C's, 2S's

GCE O/L

St.Anthony's Girls's School,Panadura

2011-2017

6A's, 3B's

SKILLS

Programming Languages: Java, JavaScript, SQL, PHP

Frameworks & Technologies: JSP, Servlets, jQuery, HTML, CSS, React, Node.js, Express.js

Databases & Data Technologies: MySQL, MongoDB

Cloud & Operating Systems: AWS (EC2, S3 – Fundamentals)

Development Practices & Tools: Git Version Control, Agile/Scrum, OOP, REST API Development

Software Engineering Concepts: Clean Code Principles, Design Patterns, Problem-Solving

PROJECTS

Student Attendance & Exam Management System

A role-based academic management system that automates student attendance tracking and exam result processing in an educational institution. Lecturers can manage attendance and exam results, while students can view their attendance, grades, and performance reports through a secure web interface. The system includes dynamic dashboards, AJAX-based updates, and optimized SQL queries for efficient data handling.

- Technologies Used: Java, JSP, Servlets, MySQL, HTML, CSS, JavaScript, jQuery, AJAX, Bootstrap
- Software Design Pattern Used: MVC Architecture

Online Event Planning System

This web application enables users to plan and book events efficiently. Users can schedule events and explore available options, while administrators can manage event details through a dynamic web interface.

- Technologies Used: Java, JSP, Servlets, MySQL, HTML, CSS, JavaScript, jQuery
- Software Design Pattern Used: MVC Architecture

AI-Enabled Smart Healthcare Appointment & Telemedicine Platform

Developed a cloud-native full-stack healthcare platform enabling patients to book doctor appointments, attend video consultations, and manage medical records. Implemented using a microservices architecture to ensure scalability, security, and efficient service communication.

- Technologies Used: React, Spring Boot, MySQL, Docker, REST APIs
- Architectural Style Used: Micro services architecture
- Integrated real-time features such as appointment status tracking and notifications
- Designed scalable backend services using Spring Boot and microservices principles

Tourism Web Application <https://go-ceylon-frontend.vercel.app/>

This web application helps users easily explore travel destinations, get attraction-based tour guides, interact with an AI-powered chatbot for assistance, and track tours using RFID technology. Administrators can manage tour packages and bookings seamlessly.

- Technologies Used: React.js, Node.js, Express.js, MongoDB, RFID Technology, AI (Chatbot Integration)
- Software Design Pattern Used: MERN Stack Architecture (MVC principles)

CERTIFICATES

Java (Basic)-Hacker Rank
SQL (Intermediate)-Hacker Rank
Front End Web Development-UOM
Certificate of English-British Council
